2. Rotate the knob (3) a quarter-turn counterclockwise to loosen it. Extend the top duct (2) from the bottom duct (1). Once the top duct (2) reaches the desired height, rotate the knob (3) a quarter-turn clockwise to lock the position.

3. Open the rear doors. Install the adjustable air block panel (1) under the EIA rails to seal the gap between the rails and the floor. Adjust the length of the air block panel (1) by rotating the knob (2) a quarter-turn counterclockwise to loosen it, extending the panel (1), and then rotating the knob (2) a quarter-turn clockwise to tighten it.

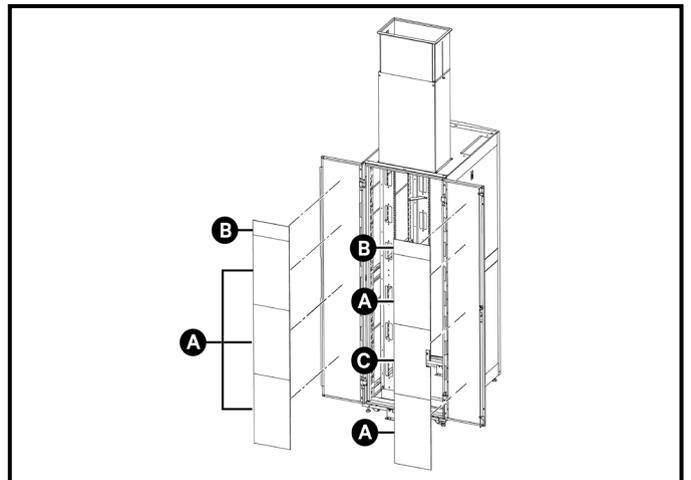

4. Install the air block panel on the bottom frame with two push-in rivets.

5. Snap the magnetic rear door panels A, B, and C onto the interior of the rear door, from top to bottom. Install the panel C around the door lock.

NOTE: Panel B is used in 48U racks only.
