

COMPANY BACKGROUND

This global automotive manufacturer has a strong presence in Malaysia and Southeast Asia. Through Vertiv's SmartRow™ solution, the customer was able to achieve the highest levels of availability and scalability in its new data centre site.

Case Summary

The Situation

As part of its modernization efforts and to improve business processes, customer set out to build a new office server room to handle business demands. This new server room is located in Kinrara, Puchong.

The customer was looking for an innovative solution that would allow them to be ahead of the competition, while addressing their IT and infrastructure demands.

Location: Malaysia

Products/Services: SmartRow™

Critical Needs

High efficiency and availability infrastructure that can fit the limited floor area of the customer's new server room. Moreover, the solution should be flexible and agile enough to meet future capacity demands.

Outcome

Vertiv's SmartRow™ solution was deemed the best fit for the customer's new server room compared to a conventional infrastructure build with its integrated solution combining power, thermal and infrastructure management. Moreover, its compact design enables rapid deployment, meeting the customer's project delivery timeline. Its centralized monitoring feature also enabled the customer to have intelligent insight from its Singapore headquarters, allowing for ease of management.
